

MODARIS

*The benchmark pattern-design solution
for the fashion market*

KEY FEATURES

- Job-oriented guided functions to gain time and reduce development costs.
- New Lectra automatic grading application - Easy Grading - to optimize grading tasks.
- Dynamic measurement chart to ensure perfect fitting.
- Wide interoperability capabilities to optimize communication and share information.

OVERVIEW

As a professional of the apparel market, your everyday challenges are reducing your product development cycle, ensuring of the perfect fitting and grading of your garments, improving your overall communication and enjoying the use of a simple and user friendly pattern-design application!

Modaris offers you a complete set of pattern-design applications taking into account the type of activities you need to perform as well as your expertise level and productivity requirements.

WHAT IS MODARIS OFFER?

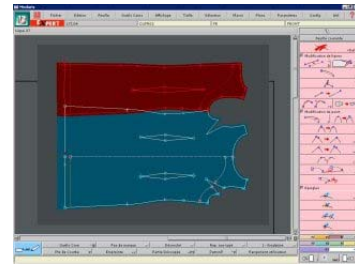

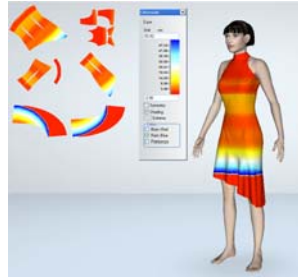

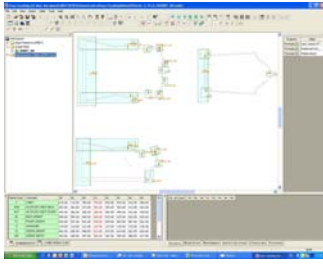

Modaris Mode V5R1 provides all fundamental functionalities to digitize, modify, check, industrialize and grade automatically.

Modaris ModePro V5R1 brings the freedom to create thanks to creation, control and modification tools. It also includes all Modaris Mode V5 functionalities, such as the new and innovative automatic grading application: Easy Grading.

Modaris ExpertPro V5R1 boosts productivity with its unique and efficient pattern creation approach: the all-size pattern-design concept. It enables to work with flat patterns presenting dependencies, unique and powerful association functions that ensure full consistency of pattern pieces of a style and its variations at any moment in the development process. With Modaris ExpertPro V5R1, tedious checking tasks are avoided, perfect product quality is ensured and pattern designers dedicate more time to creativity.

MORE WITH LECTRA 3D VIRTUAL PROTOTYPING SOLUTION

Modaris 3D Fit completes Modaris range by simulating in 3D pattern designs developed in 2D. It offers you a large set of dedicated pattern design tools to control fit, validate style design and specs and validate collection content. You will reduce your development time and costs by speeding up prototyping process and improving communication among all actors involved in the process (designers, pattern-makers, product developers, sales).

BENEFITS

Modaris V5R1 enables rapid creation of patterns for all types of garments, from the most simple to the most complex, such as lingerie or "haute couture". With Modaris V5R1 you can reduce time-to-market and costs of product development.

With Modaris V5R1, you also benefit from Lectra's unique and powerful – and:

- Save up to 70% of time on grading activities.
- Capitalize on grading knowledge.
- Ensure product quality and fit.

With Modaris 3D Fit and the introduction of 3D to your prototyping and product review activities, you can:

- Reduce the number of physical samples.
- Re-enforce pattern designer's creativity and productivity.
- Anticipate precise specs definition.
- Have closer and more efficient collaboration between all the actors of the product development process.

With Modaris V5R1, you also communicate better with all actors involved in product development process by sharing, in real time, all pattern-design information via Lectra Fashion PLM.

SPECIFICATIONS

Hardware and software configuration for each Modaris V5R1 module:

- Processeur Intel® Pentium® (III 800MHz; IV 2GHz).
- Microsoft® Windows 2000 (Service Pack 3 and Service Pack 4), Windows XP® (Service Pack 1).
- 256 Mo of RAM minimum.

ABOUT LECTRA

With 1,500 worldwide employees and \$260 million in 2005 revenues, Lectra is the world leader in software, CAD/CAM equipment and related services dedicated to large-scale users of textiles, leather and industrial fabrics.

Lectra addresses a broad array of major global markets, including fashion (apparel, accessories, footwear), automotive, aeronautical and furniture.

Lectra is listed on the Euronext Paris stock exchange.
